EDMONTON, ALBERTA, FRIDAY, JAN. 30, 1953

berta Plant To Make 'Wonder' Plastic

\$13,000,000 plant near Edmonton will soon be turning out a wonder plastic which has found uses in everything from unbreakable drinking glasses to insulation for submarine cables.

The new product, considered one of the most versatile and useful

of the most versatile and useful plastics, yet produced by modern science, is called polythone.

It first proved its qualities an insulation in wartime radar equipment. Sir Robert Watzon-Watt, British radar wiazrd, credited polythene with transforming "the design production, and installation sign, production, and installation and maintenance problems of airborne radar from the almost in-solublet to the confortably man-ageable."

TRANSATLANTICE CABLE

Feacetime communications operators have since become enthusiastic about its commercial value. More than 1,000 miles of polythene-insulated cable was used last sumpare when the salls able to the salls and the salls about th mer when the cable ship Monarch revamped the old submarine link between Halifax and Porthcurne.

convinced polythene is in the com-munications field to stay. Canadian Industries Limited

Canadian Industries Limited picked Edmonton for the site of Canada's first polythene piant because the area's oil fields are rich Drake, skip; James Percival, third; Dick Dinawall, second, and R. Lead. Their curling must tion late in 1953, will turn out eight times the amount now avaliable through imports, from the United Kingdom and the United

Letter to the Editor

Dear Sir: In the papers recently there has been much written about the new version of the

ly there has been much written about the new version of the Bible, Protestant and Catholic. What I would like to ask is, does the world, or the people, need a New Bible? Is a new bible necessary? Has the old lost its usefulness, and will the new make any vital difference?

For many, many years people have been reading the King James Version, and shaping and fashioning their lives by what they found written therein. I have two Bibles beside me as I write this letter, and on the front leaf it clearly states. "The Holy Bible, containing the Old and New Testaments, translated from out of the original tongues, and with the former translations diligent'y compared and revised by His Majesty's special command. Conformable to the Edition of 1611, commonly known as the Authorized or King James Version."

And now after 15 years of study, a 15 year, interdenominational Protestant undertaking, they come with a New Version.

It is stated that this New Ver-

It is stated that this New Version of the Bible is hailed by church leaders as a major religious milestone. As I remember milestones in the old country 50 or 60 years ago they indicated, or told how far you had travelled from the town or city you had left, and how far you were from the next town or city. Mr. Editor, if this New Version, or Versions do just that they may have accomplished their task.

I ersonally I fail to see any real stamp of encouragement to the traveller on the highway of life. People are always asking, is the new any better than the old. All we need to say is, if people would only read, and inwardly digest its contents, they would not need a

And may I say, in my opinion, if these translators had been working for any business firm, or working for any business firm, or any union and had produced no better results after 15 years' work I believe their pay cheques would have been held up, and remembering the warning of Revelations 22:18, adding to, and taking away from the words of this prophecy. It may be argued that does not apply to a new translation. Then what does it mean, for a private interpretation of the Scriptures, and misinterpretation in preaching are tion of the Scriptures, and misin-terpretation in preaching are ways of adding to, and taking from this prophecy. And the Apostle Peter in his second Epistle 1:20 says, "Know this first that no prophecy of the Scriptures is of any private in-terpretation.

was pleased indeed to hear one beloved premier, Hon. E. C. Manning take such a firm stand for the King James Version, and

BRITISH FIRM TO OPEN EDMONTON PLANT

EDMONTON — (BUP) — A British-owned company with branches from London to Borneo and interests ranging from cosmetics to elephants, has entered the brick manufacturing business here.

Borneo Co. Ltd. purchased a brick and tile plant on the city's northwestern outskirts, and when \$2,000,000 modernization and building program is completed the firm will become the largest pro-ducer of bricks in Western

C. Cousins, managing director the newly-formed Alexandra Brick and Tile Co. (Canada) Ltd., said output would be increased about 500 per cent when the streamlined plant goes into production in 1954. Output will be boosted from 5,000,000 bricks in 1952 under the former owners to 25,000,000 bricks yearly.

The stepped-up production may signal a gradual revolution home construction on the prairies, where at present lumber has been the main material used in housebuilding.

Cousins emphasized, however, the chief current demand was for structurtl clay products for new industrial buildings, offices and apartment blocks in this boom

Many of the old buildings at the Alexandra plant are being demolished and old machinery is being replaced by new equipment: The ne wplant will eventually cover 75 per cent more ground space than the old one and the work force will be about 50 men, some of them highly-skilled specialists.
The latest method of "burning"

bricks, in tunnel kilns, will be adopted because it is economical on fuel. The company will use natural gas as fuel as it is easily available in the Edmonton area in vast quantities.

Cousins, who was manager of Borneo's huge brick plant Singapore for many years, said the firm holds no fear brick pro-duction will be held up for lack of raw material. The plant is located on clay deposits which are expected to last for more than years at peak production

It is the Borneo company's first venture on this continent but in the Far East the firm has a vast trading empire, carved out 100 years ago in the spirit and tradition of the great merchant adven-

turers. There are major branches in Siam, Malaya, Indonesia, Bor-neo and other rich countries of the Orient.

.The company's vast operations include lumbering in the great teak forests of northern Siam, where elephants provide the "horse-power"; tin mining; managing rubber estates; engineering; rice trading; production of tea; auto dealing; acting as agent for shipping, insurance and airways companies; and import and export of products ranging from facepowder and crocodile skins to refrigerators and light railways.

These Productive Farmers

In Great Britain criticism is being directed at farmers with the failure to produce abundantly. The same charge cannot be laid dantiy. The same charge cannot be laid against the farmers of the prairie provinces

against the farmers of the prairie provinces in western Canada.

In the 900 miles sweep across these prairie provinces there are about 230 thousand farmers engaged in grain production. This year they planted 43,209,000 acres of wheat, oats, barley, rye and flax.

The federal government's estimate of the total grain production in this region is 1,302,350,000 bushels —— 632 million bushels of wheat, 315 million bushels of oats, 285 million bushels of barley, 233 million bushels of rye and 12 million bushels of flax.

This seeding was done last spring about the same time that harvesting had to be completed on a large percentage of last year's crop. On many farms harvesting and seeding proceeded at the same time.

ing proceeded at the same time.

If there is another group of 230 thousand farmers anywhere in the world which can fill the record of these western Canadian grain producers, we would like to hear about them!

The Use Of Fertilizers

Dr. L. H. Newman, who recenfly retired as Dominion Cerealist after a long lifetime of valuable effort devoted to the advancement of Canadian agriculture—has been applying himself on his farm in Ontario, among other things, to experiments with fertilizers. Dr. Newman has applied fertilizer on some poor parts of his farm in quantities far in excess of those usually recommended. The results have been startling. The fields that have shown the greatest profit have been those which had applied to them the greatest amounts of fertilizer. Here, then, is something in practical land management that is worth of the attention of all farmers. It would be well worthwhile for farmers themselves to make careful experiments, using on small plots much larger amounts of fertilizer than they have been in the habit of doing, and to take careful note of the costs and the wields. and the yields

We must remember that much of what we are doing in agriculture is still in the elementary stage, and that a farmer with his practical work can make experiments and might find things out that may be of benefit to all other farmers. The idea should be to take nothing absolutely for granted, but to try all kinds of things on a small scale. Something valuable may occasionally come out of such experiments as it did with Dr. Newman.

Cigarettes and Cancer

Doctors Evarts A. Graham, Ernest Wynder and Adele B. Cronnger, of Washington University School of Medicine, St. Louis, and Memorial Center New York, reported recently to the National Academy of Sciences that the free signature and a view of the control of the National Academy of Sciences that the free signature and a view of the control of the National Academy of Sciences that the free signature and a view of the control of the National Academy of Sciences that the free signature of the National Academy of Sciences that the free signature of the National Academy of Sciences that the free signature of the National Academy of Sciences that the free signature of the National Academy of Sciences the Sciences of the National Academy of Sciences that the Science of the National Academy of Sciences that the Science of the National Academy of Sciences that the Science of that tar from cigarette smoke will produce cancers in mice when painted on skin over a

period of one year.

Previously, the subject of lung cancer, as affected by cigarette smoking, had been treated by Dr. Graham and by English scientists. These studies, Dr. Graham said, show tists. These studies, Dr. Graham said, show that, in cases of cancer of the lung, a history of excessive cigarette smoking for a period of years is almost always found. He also asserted that it was rare to find a case in a non-smoker

Since lung cancer is increased so much in frequency in the last few decades, the subject is an important one. Dr. Graham reports that lung cancer is now the most common internal cancer found among males. These reports, while possibly not all-conclusive to many, cast an interesting light on some of the aspects of smoking. The statement that lung cancer is rarely found in non-smokers, certainly should ancourage this smokers certainly should encourage this group, even if it does not discourage the

The Bible Today

The most important thought I ever had was that of my individual responsibility toward God.

Everest Defeats Climbers

The latest attempt to conquer Mount Everest has ended in failure. A courageous Swiss mountain-climbing expedition reached a height of over 27,550 feet in a game, but unsuccessful, effort to surmount the 29,002-foot peak.

The Swiss Alpine Research Foundation in Zurich, Switzerland, says the climbers were forced to turn back in spite of a great

were forced to turn back in spite of a great effort to reach the top, which cost the life of one Napalese porter and injured three

The expedition was led by Dr. Gabriel Chevalley, a 32-year-old Geneva surgeon. Though it is not confirmed, it is reported that three climbers made a final camp on November 19th, which was only a few hundred for the confirmed. dred feet from the top of the world's highest mountain. A last desperate try to reach the peak was scheduled for the next day, but thirty degree-below-zero cold and raging winds, which hurled stones through the air, forced the three to surrender and leave Everest unconquered.

The expedition was an extremely costly one, in that it cost a man his life and injuries to three others. Though we have not been able to appreciate mountain-climbing as some do, we must nevertheless admit it holds a certain fascination for many. However, the reward is small in view of the human life risked. While a successful scaling of the highest peak would be an example to the world in courage and adventure, it would nevertheless not bring back to life all those who have died in the attempt to con-quer Everest. We are inclined to think that quer Everest. We are inclined to think that the plans of at least one country, through which climbers must pass, to forbid future attempts, has much merit. Even a com-pletely successful ascent is not worth the life of any one of the victims the mountain has already claimed.

Pork Support Losses

The federal government is understood to have lost some \$3½ million to date in its efforts to support hog prices by buying canned pork. About 16,500,000 lbs. has been sold by the government, but it still holds another 49 million lbs. Almost \$39 million had been invested in covered pour and soles. had been invested in canned pork and sales have realized \$5,700,000. The canned pork is being offered at about 40 cents a lb. compared with the purchase price of about 57

From Readers' Digest

By Mrs. Paul O. Snyder

It was just before Christmas, and my sister Gladys, who had saved \$50 from her year's pay to spend for herself, was trying to decide what she wanted most among the enticements of a large department store.

The sobbing of a little girl in the growded.

The sobbing of a little girl in the crowded aisle interrupted her shopping. "My mom-my's losted," the child wailed. She was a forlorn little thing of about three, in a dirty ragged dress and wornout shoes.

Suddenly Gladys knew what she wanted for Christmas. She made friends with the lost little girl and then took her to the children's department. She bought her a complete outfit — underclothes, shoes, socks, dress, coat, hat and mittens. In the ladies' room, she scrubbed her and shampooed her bair. Then on want the hair. Then on went the new clothes and into the wastebasket went the rags. A trip to the toy department finished the day and she took a very happy baby, clutching a doll. a balloon and a bag of candy, to the Lost and Found. Kissing her, Gladys left quickly. I've often wished I had seen the mother's face when she claimed her little girl.

POOL PAYS \$1,161,000 FOR ELEVATOR RESERVES

Cheques totalling \$1,161,000 were mailed from the head office of the Alberta Wheat Pool Saturday to complete the purchase of reserves contributed by Pool members in the 1923-28 period.

on grain deliveries by members to involved in estates of deceased provide capital and build an members to the amount of \$300,000. tions were two cents a bushel on wheat delivered for elevator purposes and one cent to provide for made during March. capital. The total thus realized was about \$8,400,000.

The original plan provided for the continuation of the policy of 1. Name the two Canadians who taking deductions from members who joined later and making repayment to those who made the earlier contributions.

Financial difficulties originat-ing in the depression prevented the plan from being carried out.

In 1941-42 the Pool delegates at convention approved a plan to purchase elevator reserves and each year since then substantial amounts from the earnings of the Pool were devoted to this purpose. This last payment clears up completely the original reserve deduc- 5. tions

The reserves so purchased have been redistributed in the form of patronage dividends. Such divi-

paid in the form of patronage

When the Wheat Pool was or-ganized in 1923 it was decided to deceased members. There are make deductions from the returns now patronage dividend reserves

After Explosion At

Utilities Plant

VERMILION-The natural gas explosion in the central generating station of Canadian Utilities Limited at Vermilion that oc-curred at 7:30 a.m. recently, demonstrates once more how disaster can strike even where every precaution has been taken against even the most remote contingencies.

It also demonstrates the value of the complete provisions that have been made over the past years for the interconnection of practically all the power lines of the Province. By reason of this, failure of supply at any point can be overcome by energy drawn from any of a number of generat ing stations, either of Canadiar Utilities Limited, or of other Companies or Corporations. In this particular emergency, Calgary particular emergency, Power was able to meet the need: of the situation, but, should such a necessity arise, practically the whole generating capacity of the province could be made available

As nearly as can be determined the natural gas explosion was con fined to the switchboard structure to which gas had seeped in from outside the building. While the explosion was definitely localized some appreciation of its severity can be gauged by the fact that over 40 windows were shattered by the blast.

As could be expected, considerable damage resulted, but not nearly as much as might have been anticipated. Fortunately none of the staff were injured in any way.

Canada's fine paper mills! unike the "one product" newsprint will, are called upon to produce a very wide range of papers re-quiring great skill and versatility.

"STEAM KETTLE" DAYS SURVIVOR-D. J. Doughty, doorkeeper at the head office of War Assets Cosporation, in Montreal, looks extremely critical of the 100-years-old working model of a steam engine which has been turned over to the Crown Company as "surplus". In Doughty himself has a venagable record saving fought to the Ekvatian War, and as his ribbons denote, he was in at World War I as well.

News Oddities

T-Day

PHILADELPHIA, Pa.— It was recently T-Day for five of the six children of Mr. and Mrs. LeLo Dugan. All five had their tonsils removed on the same day.

Lady Cowhand

CHICAGO — For the first time in the 87-year history of the Onicago stockyards, there's a cowgiririding herd on the cows, steers and bulls. She's Mrs. Phyllis Long, 32, five feet 61/2 inches tall and weighing 138 pounds.

Cat "Ghost"

LOS ANGELES — John P. Turk had been driven to near desperation in recent weeks by a mysterlous caller. Answering his doorbell on numerous occasions, Turk
would find no one. Finally, after
such a ring, Turk searched the
neighborhood and crame back to
his porch to find a cat, named
Sally, on the porch bench, with
her paw on the buzzer.

Burns Fatal

CHICAGO — Two years after George Bieniasz, 27, suffered burns on 60 per cent of his body, he died, in a local hospital. Bieniasz, a utility company lineman, was burned when a blowtorch exploded in the attic of his home. In the two years he underwent 162 transfusions and 13 skin grafts — all to no avail.

Cops Get Hot-Rod

OAKLAND, Calif. — Tired of being outdistanced by teen-age hot-rodders, police asked the City Council to authorize the purchase of a souped up car of their own. Council did — bought an eight-cylinder 160-horse power sedan, expected to better 100 m.p.h. at a cost of \$2,500.

Alert Cop

LOS ANGELES—Just as a man held up a Wilshire boulevard cafeterla and took \$1,381 from the cashier, Policeman Val Ulan passed by and looked in The holdup man backed out the front door, right into the arms of the waiting policeman.

Laughs Self To Death

TOKYO—Mrs. Kimino Hakagawa laughed so much during a comedy at a movie house in Osaka, that she suffered a fatal hemorrhage of the brain.

Dreamer Wins \$1,900

BRISBANE, Australlia—A pious Sydney bookseller, Vince Read, who claims he dreams the winning numbers in the state lottery, recently picked up another \$1,900 by drawing third and fourth prizes. Read, a regular churchgoer, won more than \$3,200 last year.

Follows Mate In Death

IDAHO FALLS, Idaho—As Mrs. Clyde Brainard, 72, arrived at the door of the hospital room where her husband was she was informed that he had died. The elderly woman, turned, collapsed and died the infution after her 84- year.

ALBERTA SAVING LAKES BY CONSTRUCTION OF DAMS

Alberta lakes that show signs of drying up are being saved by a program of water stabilization carried out by the provincial water resources department.

The department has given notice in northwest Alberta have been reserved to pave the way for sta-biliation projects in that area. The lakes are Albright, Anderson and Sinclair, southwest of Spirit River

Ben Russell, provincial director of water resources, said outlets of a few lakes in Alberta are dammed each year to maintain water levels. About 2 water sta-

Lot 119, Skyline Trailer Park Edmonton, Alta. Ph. 783477

that lands surrounding three lakes bilization projects have been carried out, he said. They include one at Lac Ste. Anne, west of Edmonton.

In deciding what lakes should be saved, Mr. Russell said, the de-partment confers with Ducks Un-limited and the fish and game branch of the provincial lands and forests department.

Dams built at the edges of lakes are designed to assure a continu-ing water supply for domestic purposes, for the propagation of ducks, and for the protection of fishing grounds.

No definite plans have been laid for a start on the three northwestern projects, Mr. Russell said He reported that water levels in Alberta this year have been higher than normal, and the water resources department is taking care that its water stabilization projects do not result in flooding

LETTERS TO LOUISA

I am sixteen have been dating a boy about three years. He is twenty and I am very much in love with him and he says he loves me. He asked me to marry him last fall and we decided to wait until Christmas. decided to wait until Christmas.
He had an operation and we couldn't be married then. He has not mentioned marriage since.

He is now in the Air Force and he says if I date anyone else while he is away, he won't come back

I don't feel that I should sit at home while other girls and boys have fun. Please give me advice.

L.M.

Perhaps your friend realized that you were both too young to get married last year and thought it was better to wait until he finished his time in the Army. But if he never mentions marriage to

DR. F. J. GREANEY,

Director,
Ine Elevators Farm Service,
Winnipeg, Manitoba,
ed by the following companies:
Alberta Pacific, Pioneer, Canadian
idated, Paterson, McCabe, Parrish &
cter, Inter Ocean, Independent,
Milling, Canada West and Quaker

The demand in recent years for varieties resistant to rust, wilt, and other diseases has brought about many important changes in the flax varieties grown in the Prairie

Provinces.

Variety Shifts. Surveys conducted since 1949 by the Line Elevators Farm Service show that the flax variety picture is changing rapidly, particularly in Manitoba. In 1949, for instance, three varieties—Dakota, Royal and Redwing, occupied 80.4% of the total Manitoba flax acreage, whereas in 1952 these three varieties were grown on only 28.7% of the area. Flax variety changes in Saskatchewan and Alberta have also been important, but less rapid and not so striking as those occurring in Manitoba.

New Varieties. Within the past few years several new flax varieties have been licenced for sale in Canada. A brief description of 4 of these follows. (1) Rocket—This is a medium to late variety. It has brown, medium to large seeds. Rocket is resistant to wilt, and moderately susceptible to pasmo. (2) Redwood is a late variety which ripens uniformly. It has brown seeds of average size. Redwood is resistant to rust and wilt, and tolerant to pasmo. It has yielded well in southern Manitoba. (3) Sheyenne—This is an early variety with small, brown seeds. It is resistant to rust and wilt, and tolerant to pasmo. Sheyenne is not a high yielder—(4) Marine—This is another early variety. In appearance it is similar to Sheyenne, but a much better yielder. Marine is resistant to rust, resistant to wilt, and tolerant to pasmo. It will likely replace Sheyenne.

In summary, Rocket and Redwood are late-maturing varieties adapted to the southern part of the Prairie Provinces only. When sown early they will outyield the new early-maturing varieties Sheyenne and Marine. If flax must be sown late, use a short-season variety such as Marine or Sheyenne. Farmers desiring seed of these new flax varieties should contact their Provincial Crop Improvement Association.

you and has no plans for the future, I should be loathe, if I were you, to sit at home and give up all of my friends in the hope that when he comes home, he will

decide to marry you.

Why not write and tell him that, Why not write and tell him that, since you are not planning to be married at any definite time, you think that you should have the privilege of other companionship. And then, when he comes home, you feel sure that you will care as much for him as you ever did and that if he feels the same about you then as he does now, you can you then as he does now, you can both go on from there.

LOUISA.

Dear Louisa:

I have a little girl who gets along very well at school. She is very fond of basketball and wants to practice for the team every afternoon

Now, this is my problem, when she devotes so much time to bas-ketball she doesn't have time to do her lessons properly and yet I think she needs the exercise, as she seems to be healthier and happier since she has been on the

What would you advise me to do?

Answer:

I would let her keep on with her basketball if I were you. After all, what we get out of books is only a part of what we need in this life.

We need good, healthy bodies and healthy minds. We need to know how to get on with other people and the value of good team

work and good sportsmanship.

Therefore, I would let her give part of her day to work and part

part of he to play.

It is a mistake, I think, to require a child to stay in school all the morning and then to spend the afternoon doing homework.

The ideal school is the one

the afternoon doing non-The ideal school is the one-where the children do all of their studying there and have no home-work or, at the worst, very little. LOUISA.

Love Conquers All

HOW THE R.C.A.F. HELPED SANTA IN THE ARCTIC

OTTAWA Though Santa and Christmas have gone for more than a month, the tre-mendous job Santa had to do in the Arctic is still worthy of mention. The assistance lent to Santa by the RCAF rates high commendation.

Christmas air drops this year were made at such widely scattered spots as Nottingham Island. Resolution Island, Island, Arctic Bay, Cape Hopes Advance. Mould Bay Eureka and Alert all located in Santa's back-yard.

The most northerly station.
Alert, is over 2,500 miles north of
Montreal, just under 600 miles
from Sant & workshop at the
North Pole. North Pole.

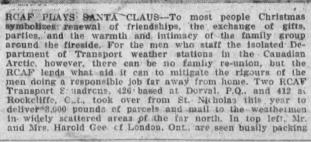

Taking over from Saint Nick this year were two RCAF squadrons, 426 transport squadron based at Dorval, P.Q. and 412 transport squaron based at Rockcliffe, Ontario, While 426 North Star aircraft visited the stations farthest from the mainland in the western and far northern Arctic, 412
Dakota's made the drops in the
eastern Arctic.
Preparations for the Christmas

drops started many months ago. Back in October the Department of Transport notified each family concerned that a Christmas de-livery would be made by the RCAF. They were also advised to have any parcels and mail in the hands of the RCAF by mid-November for parcelling in the special heavy canvas containers used for dropping purposes. While some supplies were parachuted to the detachments, the majority were "free-dropped" and were therefore subject to damage if not securely wrapped.

Around the first of December the heavily bundled Xmas gifts were assembled at Fort Churchill, Man., and Goose Bay, Labrador ready for the transport squadrons and the weather to make delivery possible. Then around the middle of December they were picked up by the aircraft and flown to the various remote locations. The weather is the chief factor in any Arctic flying and the aircraft must be ready to take-off on the first sign of good weather. Incidentally the weather reports that the air-crew use to plan their flights were assembled from the weather detail sent out by the very people who will receive the Christmas parcels.

The dropping of the supplies is always an exciting time weathermen. For many months the only sign of civilization some 2,000 miles to the south has been the summer sinp which made its yearsummer simp which made its yearly visit to unload heavy equipment
and rations in August. Since that
time visitors have been nonexistent. The day of the drop begins early for the entire detachment. With the help of the
Eskimoes who live close by the
weather shacks in their Igloos,
large oil drums are carried to a large oil drums are carried to a clear area away from the buildclear area away from the buildings, to mark the dropping zone. Roaring fires are lit in the drums as a guide to the aircraft and these are attended eagerly by all hands. Due to the small amount of daylight at this time of year, roughly two hours of twilight in December, the fires are a necessity if the aircraft is to find the drop. if the arcraft is to find the drop-ping area. The landscape below the aircraft is one of unending whiteness, broken only here and there by a few rounded hills. The shorelines blend into the ice-covered sea making it impossible to tell water from land. Only the navigator huddled over his charts fully guide the plane

gifts for their son Bill who has been stationed at Arctic Bay for two years. Left centre shows RCAF groundcrew loading the bags of mail and parcels aboard a North Star aircraft at Dorval. Lottom left: After carefully surveying the intendered area, the parcels were parachuted out where they were eagerly awaited by the men below who wave their thanks. Top right: This portion of the map of Canada's northland shows where they wardened was the particular descriptions of the map of Canada's northland shows where they various drops were made. Bottom right: This shows the the various drops were made. Bottom right: This shows the final phase of the successful operation with the weatherman reading the letters from his friends and loved ones at home, while in the cold, grey skies overhead, the RCAF transport aircraft head back for home with their crews in a warm glow of a got I job well done.

Eskimo children must find this the first drop is always a tense in equally exciting time for they moment for both aircrew and the can be seen running and jumping weathermen.

School Play

Delights Audience

CROSS (DLD—The Crossfield High School play, "The Darling Brats," was received by a record attendance on Thorsday and Friday evenings, Jan. 22 and 23, and those who were unable to see it missed a real treat.

The three-act comedy will be taken to Halzac in February, so try to get there if you want a good laugh, and watch some very fine acting in the bargain. Get in touch with Mr. Mumby as to the date.

Acting in the bargain. Get in touch with Mr. Mumby as to the date.

The characters: Junebug, colored cook, Viola Harder. Cynthia Darling, a grown Big Sister to the Darling brats, Joyce Jensen, who has the responsibility of her two sisters and a brother to cope with. Jack Henry, played by Marvin Miller, who turns out to be an old sweetheart of Aunt Agatha, who spends money on the "brats" to give them a good time to the consternation of Cynthia, who feels they are being spoiled. Harold and Barbara, played to perfection by Larry High and Julie Schoche as, were perfect little demons, who never missed a beat when it comes to creating devilty at everyone's expense. Aunt Agatha was played by Mary Laut, and was a very sweet indulgent person with just enough romance left to swell the already implicated romances of Cynthia and Theresa, the latter character expertly acted by Irene Landymore. Rod Vinton, characterized by Murray Fleming, as Cynthia's loyer was well acted. Appleton Crab, a wealthy townsman, played by Eugene Harder, was perhaus the highlight for the play, for the brats subject him to nothing less than torture as he pursues his love.

for Aunt Agatha and ends up being engaged to Mrs. Vinton, admirably enacted by Joyce McDonald, who was a widow but an excelent cook and "Fruititarian," as was Appleton Crab, whose name was always distorted to "Crab Apple." Henry Timmins, Thereas's boy friend, very bravely gets into a pack of trouble, as he was requested to masquerade for Aunt Agatha's long-lost cowboy. This was characterized by Henry Timmins in a fine piece of acting. The little masquerade was reversed as Aunt Agatha finds out her gardener, a very recent one, is her cowboy, who, disguised as a gardener, was trying to get the lay of the land before he makes himself known, and later, to her sursurprise, he is found, to be very weelthy and willing to accent viry for Aunt Agatha and ends up celent cook and "Fruittarian," as was Appleton Crab, whose name was always distorted to "Crab Apple." Henry Timmina, Theresa's boy friend, very bravely gets into a pack of trouble, as he was requested to masquerade for Auna Agatha's long-lost cowboy. This was characterized by Henry Timmins in a fine piece of acting. The little masquerade was reversed as Aunt Agatha finds out her gardener, a very recent one, is her cowboy, who, disguised as a gardener, was trying to get the lay of the land before he makes himself known, and later, to her sursurprise, he is found to be very wealthy, and willing to accept the "Brats" in the family if Agatha will marry him, as she later promises. The comedy, with never a dull moment, ends to the ratisfac. will marry him, as she later promises. The comedy, with never a dull moment, ends to the ratisfac-

account "ob dat no good fruiti-tarian" is consoled with a raise in wages. Viola Harder, dressed as a fat "mammy" had acquired just the right colored accent and cheering chuckle that was fitting her character.

splendid performance, so please tion of all, even Junebug, who get a ficket for Balzac if you has threatened to quit cooking on have not seen it here.
